YOU CAN STOP THIS THREAT

Negatives of Wind Energy (Courtesy of Norman Stephens)
Wind turbines are bad for our communities in many ways, including:

- **Audible sounds & vibrations**
- **Sleep deprivation causing health issues**
- **Higher electricity rates**
- **Lower property values**
- **Shadow flicker**
- **Inefficient, so fossil fuel plants still are necessary**
- **Miles of additional above- and below-ground transmission lines**
- **Red flashing warning lights**
- **Weak or no decommissioning language in wind ordinances that can result in eye sores for generations.**
- **Leaking oil, thrown ice, and thrown blades**
- **Dangerous for animals**

CONTACT YOUR GARFIELD TOWNSHIP OFFICIALS.

BE HEARD.

Elected Officials:

- James Dubay - Supervisor
- Connie Fantozzi - Clerk
- Karen Snyder - Treasurer
- Gerald Rivard - Trustee
- Leroy Day - Trustee
